

## MOVIS Twister

MOVIS Twister brings dynamism to your space. The models feel light, as though they were floating, while their special shape, combined with felt, augment their acoustic effectiveness. The interplay between their multi-color, printed front and the single-color back means the appearance of a MOVIS Twister installation changes depending on the angle. But it is always lively and stirring.

Please feel free to contact us with your individual size and print needs for your MOVIS Twister installation

### Material

Aluminium

formed

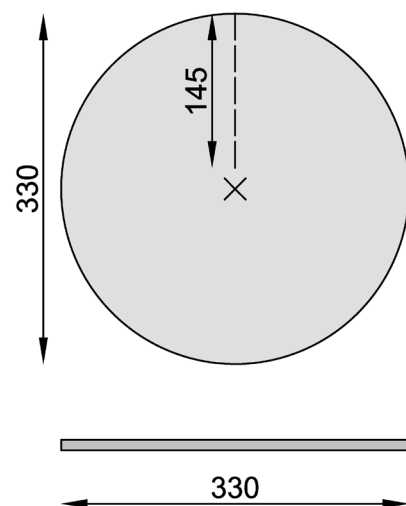

Felt

This unique, natural material possesses a variety of fascinating properties, such as heat insulation, sound absorption, heat resistance and ease of care. Wool felt is considered fire resistant and conforms to the fire-retardant norm DIN EN 13501-1 classification fl-s1 (B1).

Production: A variety of sizes, shapes and prints are available

Dimensions: 330 x 330 x 10 mm

Surface: Printed
